## SUMMARY

---

Entry-level Data Science Student and Machine Learning enthusiast with a robust foundation in deep learning, data analytics. Experienced in architecting AI-powered healthcare solutions using Python, CNN architectures, and SQL databases. Proficient in end-to-end ML workflows including data preprocessing, model optimization, and deployment.

## TECHNICAL SKILLS

---

**Languages:** Python (Pandas, NumPy, Scikit-learn), SQL, C, C++, Flutter

**AI & Deep Learning:** TensorFlow, Keras

**Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn, Advanced Excel

**Backend & Tools:** Django, REST API, Git, GitHub, Supabase, MySQL, PostgreSQL

## PROJECTS

---

### Multi-Modal Medical Imaging Diagnosis System

2026 – Present

*Deep Learning & Computer Vision*

*Python, TensorFlow, Django, MySQL*

Engineered CNN-based models for automated X-ray, MRI, and skin lesion classification using transfer learning.

Integrated Grad-CAM (Explainable AI) to generate heatmaps for enhanced clinical decision support.

Deployed model inference via a Django backend, utilizing MySQL for secure patient data management.

### Civic Problem-Solving Platform

2024

*Full-Stack Web & Mobile Development*

*Python, Django, Supabase, Flutter*

Developed a complaint management system handling 500+ records with automated data storage and visualization. Generated analytical reports on service trends and resolution performance.

### Online Ticket Booking System

2023

*Database Management Systems*

*MySQL, PHP, JavaScript*

Built an interactive booking system with structured database queries and analytical modules for monitoring booking volume and user behavior.

## EXPERIENCE

---

### Software Development Intern

Dec 2024 – Apr 2025

*Progressive Educations*

*Kerala, India*

Designed and implemented a **Flutter app** and **Python Django web platform**, enabling over **1,000 users** to submit and track civic requests.

Automated **data collection and logging** processes, facilitating analysis of **500+ submissions** for trend identification and performance metrics.

Reduced response time by **30%** by optimizing data flow and integrating real-time dashboards for status tracking.

Utilized **SQL and Python** for data extraction, transformation, and visualization to support decision-making.

# CERTIFICATIONS

---

- Microsoft Excel Expert Certification (Advanced Data Analysis)
- UI/UX Design Workshop – Zoople Technologies
- Student Delegate – Kerala Literature Festival (2023)

# ACHIEVEMENTS

---

- Secretary of the IT Club, organizing diverse tech events for the campus community
- Member of Anti-Ragging Committee
- Member of IEDC Committee
- Member of Hospitality committee in Luminance(College Fest)
